Stock Code: NX-RS-15P - List Price: £2,395.00

The RS15 is the first product to feature NEXO's patent-pending RAY SUB Technology. Comprised of a 15 inch transducer with a frequency response of 35Hz - 200Hz in omni or 35Hz- 150Hz in directional mode and a sensitivity of 105db SPL, the RS 15 presents an unchallenged versatility for installation and touring requirements.

The RS15 sub does not face the same direction while in omni and cardoid mode. In cardoid mode, the RS15 sidewalls (where the rigging system is attached) behave as the cabinet's front and rear face.

As such, RS15's cardoid LF and VLF energy propagates from only one end of the enclosure, rather than from the front face. This behaviour is maintained regardless of whether snaker cones are positioned on the side or top.

Quick-Start Guide

- Browse the Fuzion catalogue using the drop-down menus in the top left-hand corner
- Select the category you wish to browse, for example 'Loudspeakers'
- Narrow your search by focusing on a particular brand, for example 'Nexo'
- Scroll through available products to select the one you want
- Need more information on the product? Click the 'Datasheet' or 'User Manual' icons
- Click the 'Add' icon and enter the quantity you wish to add to your costing
- Enter your Fuzion discount into the first discount column

- In the second discount column, enter the discount you wish to apply to the sale

Qty	Item	List Price	% In	Cost Price	% Out	Unit Sell	SubTotal
4	NX.LS-500: Nexo LS-500	£1,295.00		£1,295.00		£1,295.00	£5,180.00

- The Profit Meter will automatically adjust to show the profit calculated directly from the current costing sheet
- Go to the 'File' menu to export your costing to an Excel spreadsheet
- Congratulations! You have completed your first costing
