OC 2000

Compact 12" subwoofer

The OC 2000 is the latest enhancement to the acclaimed Studio loudspeaker series from WORK. Specifically designed to augment the range, the OC 2000 extends bass response for applications requiring reproduction below 100 Hz. Like all products associated with the WORK portfolio, the OC 2000 delivers high performance in a workmanlike package at truly fantastic value for money.

The OC 2000 comprises a powerful 12-inch driver housed in a durable ported cabinet to add low-end warmth and punch for applications where full range foreground music is required. Very compact cabinet dimensions are another advantage for installers finding themselves short of space, and the ability to operate the cabinet both vertically and horizontally adds to the unit's flexibility.

Applications

- Restaurants
- Bars
- Nightclubs
- Leisure venues

A system comprising a number of Studio 2, Studio 3, Studio 4 or Studio 5 loudspeakers coupled with an OC 2000 provides a high performance yet cost effective solution to many audio installation requirements. Value for money does not get better than the solutions offered by this product range.

Specifications
