

## XS8

XS8 is a compact 2-way speaker model with a priority on excellent music reproduction, a very good efficiency and attractive design.

The internal crossover was designed by a German company specialised on speaker design, which results not only in excellent sonic performance, but also in well engineered protection circuits.

Two parallel NL-4 Speakon inputs offer easy daisy-chaining of the speaker signal. With a switch on the connection plate the input impedance can be toggled between 8, 16 and 32 ohms. This enables the user to run a huge number of speakers on one single amplifier channel (depending on min. load and power of the amplifier).

The XS8 offers a great variety of mounting options: Yoke mount for both horizontal and vertical installation is available as well as a discrete wall support, which allows the installer to tilt and swivel the cabinets for optimum alignment. Above that the cabinet is Omnimount® ready for series 30.0 brackets.

Due to the rotatable horn, this model can be used in vertical and horizontal orientation without suffering from phase interference (e.g. under-balcony applications).

XS8 is available in black (similar to RAL9005), white (similar to RAL9010) or unpainted.

### Tec Specs

Model	XS8
Power (watts / rms)	150
Rec. amplifier power	150 - 300
Driver	
LF-Driver	8"
HF-Driver	1" on a rotatable horn
Input impedance	8/16/32 ohms
Freq. response(+/-3 dB)	70 Hz - 19 kHz
SPL (1 W / 1 m)	95 dB
Dispersion (h x v)	100° x 50°
Connectors	2 x NL4 Speakon
Cabinet material	Multiplex plywood
Cabinet design	Trapezoidal
Colours available	black, white
Accessories	WB-S V-Yoke8 H-Yoke8
Special Features	Omnimount ready (30.0)
Dims (H x W x D, cm)	50 x 28 x 27
Weight (kg)	12.5
